About Kaiser

The New South Wales Lachlan Fold Belt is an extensive and prospective geological unit that is currently enjoying an exploration renaissance. Kaiser considers that the wholly owned Stuart Town Project located between Cadia and Alkane's new gold discovery – the Boda project, and within the Lachlan Fold Belt is highly prospective. The view that the project is prospective for gold is supported by the extensive number of historic gold mines located in the region.

Kaiser also holds the "Macquarie North" project over the northern extent of the highly endowed and prospective Macquarie Arc. The Macquarie Arc is also located within the Lachlan Fold Belt.

The licences cover 80 kilometres of interpreted strike of the Macquarie Arc, identified as being prospective for copper-gold porphyry mineralisation. The project lies to the north of licences held by FMG Resources Pty Ltd and Kincora Copper Australia Pty Ltd. The prospective target rocks are intrusive igneous rocks associated with copper and gold mineralisation in the belt and are overlain by sediments of variable depth with negligible historic exploration, despite being located in a Tier 1 low sovereign risk terrain.
